

SEMEN COLLECTION

We offer a collection service for on farm insemination, chilled shipping and semen evaluation.

Should you be considering standing your stallion to public and desire to have semen shipped nationally, it is best to have your stallion visit us for a test collection and evaluation. If he hasn't been collected previously there may be a need to have at least one training session so that he can learn to use our dummy.

Not all stallions will easily collect. We will need time to determine the most suitable extender and the style of Artificial Vagina (AV) that best suits your stallion.

We charge a fee for the collection, any freight costs for the transportation of the chilled semen is in addition to the collections fee. Chilled semen will be sent overnight via Toll Priority or by air with Qantas freight depending on the instructions of the purchaser.
