

## **MARE CARE**

**We offer personalised care for your mare.**

With safe steel yards and 24 hour care, you can be assured that your mare is in good hands.

All mares are fed twice daily and will be given Prydes Biomare and grassy lucerne hay. Should your mare require a specialised diet this can be arranged.

Mares on farm may be bred by fresh semen, chilled semen or frozen semen. Our attending veterinarian is Dr Steve Kelly of Wooroolin Veterinary Services.
